Owner: Episcopal Church

Date of erection: 1848-53

Present condition: Good

Architect: Richard Upjohn

Description:

A cruciform, unaisled church in the early English style. The nave is three bays long; the chancel and transepts one bay. At the northwest corner is a free-standing bell tower with broach spire. This is connected to the church by a covered arcade. The west front and transept ends have tripled lancet windows above pointed-arch doorways. The lancets are normal width, but in the nave they are increased to triple this size, with unfortunate results. On the bay lines are weathered buttresses which reoccur at all corners. On the interior there are galleries across the west front and transepts.
